Research Interests

My scholarship focuses on the intersections of information retrieval, digital libraries, social informatics, and scholarly communication using NLP and data science methods on digital trace data specifically scientific literature and social media data. Specifically, I want to build better search and recommendation systems as well as identify the trends, and topics in the scientific literature using NLP methods. I have worked extensively with textual data. My work combines qualitative and quantitative methods, including focus groups, survey and field experiments, and computational approaches.
